

# Third-Party Device Integration with Pointer Connect

Third-Party Device Integration allows for the seamless migration of non-Cellocator devices into the Pointer Connect platform, providing you with one fleet management system to manage all your devices. Pointer Connect is now an open platform service provider, providing enhanced flexibility by enabling the connection of devices from a wide range of vendors to meet different customer needs and price points.

## Problems Solved

- One Platform - consolidate your solutions into one platform
- Single user interface - manage old and new devices in a single user interface
- Reduced Costs - avoid costly migration efforts - let us handle the heavy lifting!

## Main Features

- Support for over 70 device vendors (600+ devices)
- Seamless integration of third-party devices
- Single user interface for all your devices

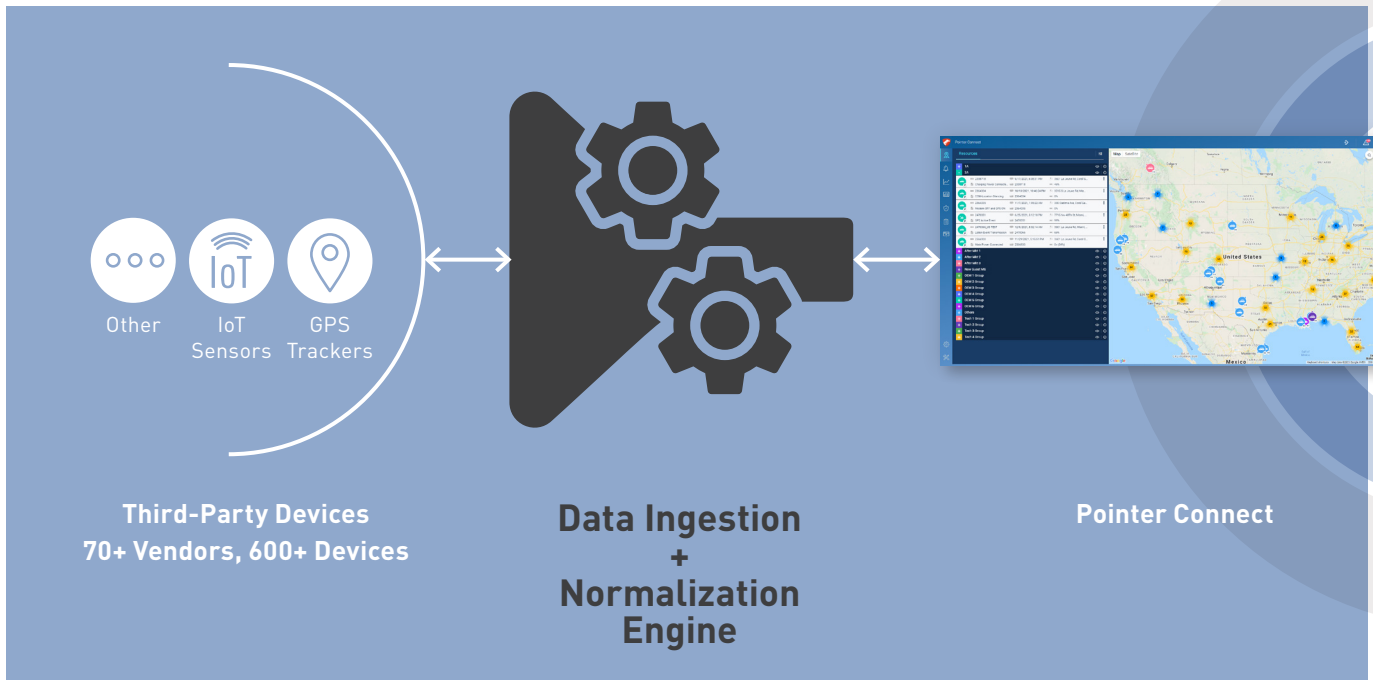

## Benefits

- **Heterogeneous System Support**  
Mix and match competitor and Cellocator devices (including old, new, etc.)
- **Single User Interface**  
Manage devices from different vendors in one screen.
- **Leveraging Existing Investments**  
Continue using your existing device infrastructure while taking advantage of our service.
- **Reduced Conversion Cost**  
Low-cost conversion and migration to our solution.
- **Seamless integration in under 3 weeks**
- **Open System**  
Open platform service model that provides enhanced flexibility.

## How it Works

### Pointer Connect - Open Integration with Third-Party Devices

Third-party device support for Queclink, Ruptela, Teltonika, Suntech, Calamp, Sierra, and many more (over 60 additional vendors).

## User Interface: Pointer Connect Key Features

### Location Tracking

View current location and historical trip data

### Events

Subscribe to events such as over speeding and geofence

### Telemetry

View speed, odometer, battery voltage, and fuel (if supported)

### Commands

Send commands such as lock and unlock (if supported)

\*May require additional development time
